

GUILHERME SALVIANO

Mid-level Backend Developer

PERSONAL DETAILS

guilhermesalviano177@gmail.com, +55(11)948449969

PROFILE

Mid-level Backend Developer with over 4 years of experience building scalable applications, API integrations, and serverless architectures. Proficient in Node.js and Go, with hands-on experience in cloud environments (AWS), message brokers (RabbitMQ, SQS).

EDUCATION

Associate's degree, Digital Games

Jan 2022 - Dec 2025

Fatec Carapicuíba

Computer Software Technology

Jan 2021 - Dec 2022

Alura

Software developer

Jul 2018 - Dec 2019

ETEC - Escola Técnica Estadual de São Paulo

EMPLOYMENT

Backend Developer

Jun 2025 - Apr 2026

Redarbor Brasil

- Architected and maintained highly scalable serverless applications using **Node.js** and **AWS**.
- Implemented **AWS Lambda** functions, **SQS** message queues, and schedulers (EventBridge) to orchestrate complex asynchronous workflows and execute automated tasks.
- Engineered custom backend infrastructure to support high-volume email and push notification triggers, integrating with HubSpot APIs.

Backend Developer

Jun 2022 - Jun 2025

Catho

- Developed and enhanced core features for the platform's alert system using **Go (Golang)**, prioritizing high availability and system resilience.
- Designed and implemented inter-service communication architectures leveraging **RabbitMQ** for reliable asynchronous message processing.
- Integrated third-party platforms (Twilio Segment) into the internal ecosystem, ensuring seamless data flow and event tracking.
- Built a custom middleware application using **Node.js** and **Express** to facilitate high-volume WhatsApp messaging integrations.
- Engineered API endpoints to connect internal databases with Salesforce Marketing Cloud, enabling complex multi-channel automation.

Fullstack Developer

Sep 2020 – Jun 2022

Enext Consultoria

- **Dedicated to C6 Bank:** Developed full-stack Custom Activities(Journey build in Salesforce Marketing Cloud) using **Node.js** and JavaScript, building both the backend APIs and the frontend user interfaces.
- Engineered custom API integrations using **scripts** to connect multiple platforms, including Marketing Cloud, Google Sheets, and Google Analytics.

Junior Backend Developer

Nov 2019 – May 2020

Catho, Barueri – São Paulo

- Developed middleware applications and REST APIs using **PHP** and the **Laravel** framework to integrate legacy databases with modern marketing platforms.
- Wrote and optimized complex **SQL queries** for MySQL databases to handle large-scale data extraction and synchronization.

Apprenticeship – CRM / Backend

Jul 2018 – Oct 2019

Catho, Barueri – São Paulo

- Collaborated in an agile squad environment between CRM and Backend engineering teams.
- Assisted in the development and maintenance of backend systems using **PHP/Laravel** in a Linux environment, focusing on API integrations and database management.
